

Investment Opportunity: Early detection center

Name:	Early detection center		
Sector:	Healthcare	Location:	Baushar
Total OMR:	7500000.0	Internal ROI (%):	0.0%
Payback Years:	7	Implementation Duration:	1.0
Reference:	MOC/01212	Type:	featured
Source:	Ministry of Health		
Description:	This opportunity is reinforced by key life events that necessitate early detection screenings, creating consistent demand across various population segments. These include prenatal genetic testing during pregnancy to identify fetal abnormalities, neonatal screening within the first 48 hours after birth to detect congenital disorders, and pre-marital screening, which may soon become mandatory under proposed legal reforms in Oman. Additionally, pre-employment screenings help employers assess candidates' health and fitness, while individuals with a high risk of hereditary diseases—such as cancer, diabetes, or metabolic disorders—require targeted diagnostic tests. Together, these life stages form a strong foundation for the sustained relevance and growth of early detection centers.
