<b>Description:</b>	<p>A hospital that provides rehabilitation treatment in an integrated manner including physiotherapy, occupational therapy, language, speech and swallowing therapy, splints, prosthetics and orthotics, foot therapy, psychotherapy, therapeutic nutrition and intensive daily care through the admission of people in need of service. Number of recipients of rehabilitation service in primary health care institutions at the Ministry of Health in 2021: -The number of first visits for the year 2021 in Primary Health Care Institutions reached 24,494 patients who received the service -The largest number of those who received the service for ages (61-70) years was 8048 patients Number of recipients of rehabilitation service in Secondary Health Care Institutions at the Ministry of Health in 2021: The number of first visits in 2021 in Secondary Health Care Institutions reached 74,226 patients. The highest number of patients was in Muscat (32,709 patients), and the lowest was in Musandam, with 357 patients. The largest number of those who received the service for ages (41-50) years was 14930 patients. Rehabilitation services depend on the multiple of treatment sessions to reach better results. it is recommended to take 3-5 daily sessions, which increases the cost of treatment.</p>
