Fisheries Sector Overview

Overview of the Agriculture and Fisheries Sector in Oman (2024–2025)

In 2024–2025, Oman's fisheries and agriculture sector strengthened its role in the national economy, contributing RO 245.2 million by Q1 2024 and RO 273.6 million in Q1 2025, supported by Vision 2040 and the Tenth Five-Year Plan. The sector recorded growth of 10.1% in 2024 and 10.1% in early 2025, reflecting rising production, improved infrastructure, and expanding export markets.

Key inferences with respect to the sector's performance:

Between 2024 and early 2025, Oman's fisheries sector demonstrated solid growth, recording higher GDP contributions and double-digit expansion rates, supported by national development plans, infrastructure upgrades, and a growing role in global seafood markets.

Market Attractiveness

Global Market between 6.78% and 10.9% CAGR (2025-2034) in algae culture

\$5.8 billion
Net global algae culture market size value in 2024

Governments and players involvement

Key market players in the market of algae culture projects

Overview Opportunity

Description

Algae farming is a sustainable and economical project aimed at producing animal feed supplements and organic agricultural fertilizers. It relies on utilizing algae as a rich source of beneficial nutrients, cultivated in controlled environments.

Rationale

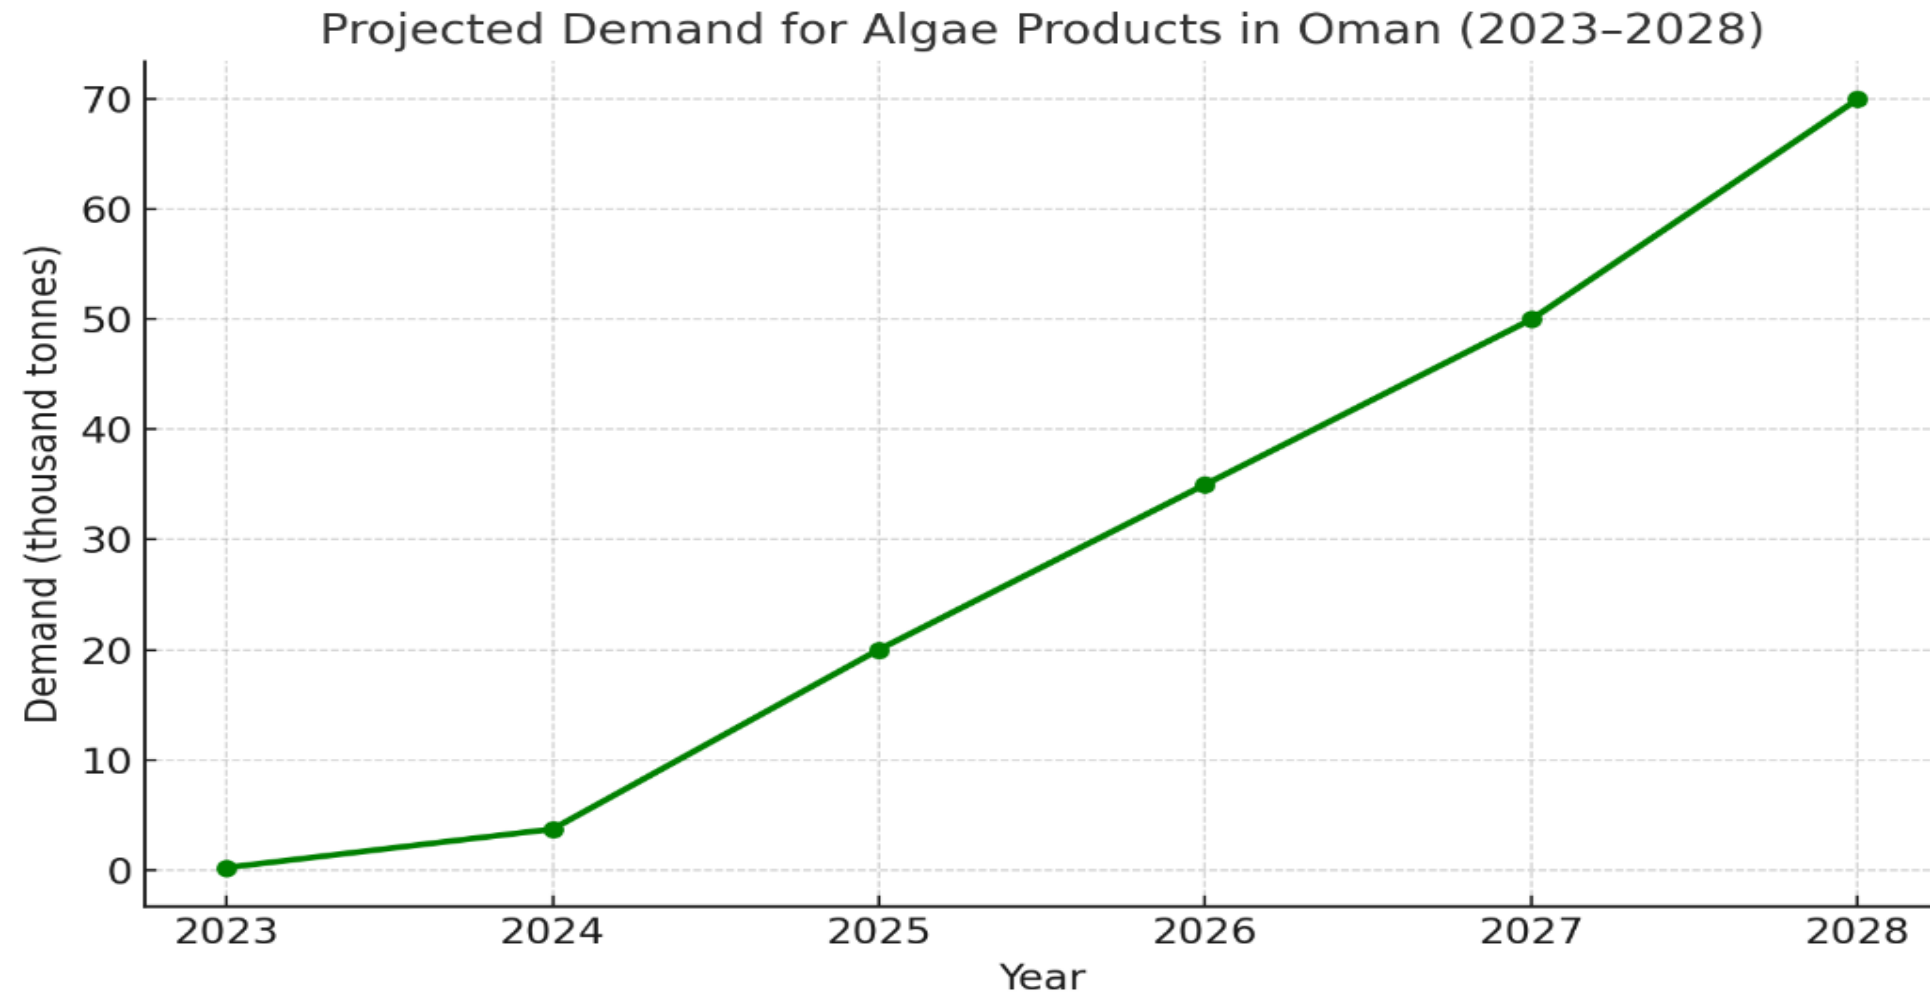

Oman's algae cultivation sector is growing under Vision 2040 and sustainability goals, driving demand for locally produced biofuels, nutraceuticals, and animal feed. This presents a high-potential investment opportunity supported by government initiatives and aligned with global green and circular economic standards.

Key indicators

Total Investment Value	2 million OMR
IRR	%18
Project Capacity	90 -120 tons annually
Land Availability	84000 m ²
